

About Us

We are an international foundation dedicated to the *Nation Change Program*, with a vision to transform underdeveloped countries currently controlled by corrupt, opportunistic mafias into nations governed by the rule of law. Our revolutionary strategy is built around the *AIEGS Formula*—an **Artificial Intelligence E-Government System**—designed to drive national development and rapid growth.

Our team consists of intellectuals, social innovators, business professionals, and dedicated Nepalese youth, working in collaboration with respected organizations like the [International Institute of Infinitism, Canada](#), [GK International UK](#), [Youth for Nation](#), and **Hong Kong Gurung Social Groups**, as well as various international Nepalese social groups. United by a shared purpose, we aim for swift, sustainable development.

Core Objectives:

Secure Borders: Prioritize national border security and protection.

Promote Local Production: Reduce dependence on imports by encouraging domestic production.

Parliamentary Reform: Limit parliament members to one representative per district (77 in total) and ensure representatives are trained youth between the ages of 25 and 40.

Enforce Strong Rule of Law: Implement an advanced legal system, using AI to ensure transparent trials. Traditional prisons will be replaced with rehabilitation centers focused on employment in road construction, mining, and large-scale livestock farming (cows, buffaloes, goats, sheep) in remote mountain regions.

Revolutionize Education: Introduce 108 specialized educational programs, including training in home appliance repair, electro-mechanical systems, and the development of innovative, job-creating ideas. Promote values of discipline, politeness, and civic responsibility.

Implement Online Voting: Develop a secure and transparent online voting system with rotating election symbols to ensure fairness in each election.

Direct Election of Prime Minister: Ensure the prime minister is elected directly by the people, with ministers selected through open competition rather than from parliament members.

We believe that by adhering to these seven principles, any country can achieve rapid development within a short timeframe. We hold the intellectual property rights to *Hidden Intelligence*, a system designed to train future nation-builders—youth aged 25 to 40—through an open, competitive process.

We are confident in the success of our mission and believe it will lead countries onto the right path with the most effective governance systems in the world. Our innovative model has the potential to inspire and guide other nations on their developmental journeys.
